Sir:

In response to the Examiner's action, dated April 13, 1998, please
amend the above-entitled application as follows.

In the Claims:

1. (Amended) A combustion turbine system comprising:
a compressor for compressing air for combustion;
a combustor connected to said compressor for receiving
compressed air from said compressor and for receiving fuel with said compressed
air and said fuel being combusted therein and producing a combustion gas;
a turbine connected to said combustor and arranged to receive
said combustion gas for driving said turbine with said combustion gas being
exhausted from said turbine; [and]
a fuel line connected to a source of said fuel and connected to
said combustor with a portion of said fuel line being disposed in heat transfer
relationship with said combustion gas thereby heating said fuel prior to being
introduced into said combustor[.]; and
a controller for controlling the amount of heat imparted by
said combustion gas to the fuel prior to said fuel being introduced into said
combustor to maintain at least a portion of said fuel at a substantially elevated
